New CAS Information Use Policies, enter HELP USAGETERMS for details.

TSCA INFORMATION NOW CURRENT THROUGH January 8, 2010.

Please note that search-term pricing does apply when conducting SmartSELECT searches.

REGISTRY includes numerically searchable data for experimental and predicted properties as well as tags indicating availability of experimental property data in the original document. For information on property searching in REGISTRY, refer to:

AB The development of a novel series of methoxyphenyl acid

methoxyphenylamide as ODN ligands is discussed. Selected members of the

series are capable of stabilizing duplexes with 10-12 bp and showed affinity

for the minor groove of the major groove. A number of potential catalytic

activity
